

Rational Governance Alliance - Strategic Paper 1

Dear Fellow Citizens and Visionaries,

Today marks the beginning of a new chapter in the story of democracy. With the formation of the Rational Governance Alliance (RGA), we are taking a bold step towards revolutionizing how we govern ourselves in the 21st century and beyond.

Our mission is both simple and profound: to harness the power of artificial intelligence to enhance decision-making in public administration while preserving the human values and democratic principles that form the bedrock of our society. We believe that by combining the analytical capabilities of AI with the wisdom and compassion of human participation, we can create a governance system that is more efficient, transparent, and responsive to the needs of all citizens.

While our vision is global, we are pragmatic in our approach. Our initial focus will be on implementation within the United States, allowing us to refine our processes and build a strong foundation before expanding worldwide. However, we stand ready to provide advice and support to potential RBDs across the globe who share our vision.

Looking ahead, we have set an ambitious goal: to have thousands of Rationally Bound Delegates on ballots across the United States in the 2026 elections. This objective represents a significant step towards normalizing AI-assisted governance and demonstrating its effectiveness at multiple levels of government.

Our commitment goes beyond just elections. The RGA is dedicated to developing and maintaining open-source AI models for governance, educating the public about AI-enhanced decision-making, and ensuring the ethical use of AI in public administration. We will stand with our RBD candidates throughout their campaigns and terms in office, providing the support and resources they need to effectively serve their constituents.

We invite you – whether you're a tech enthusiast, a policy expert, a concerned citizen, or a potential candidate – to join us in this endeavor. There's a place for everyone in shaping the future of democracy, and your voice and ideas are crucial to our success.

As we embark on this journey, we anticipate both challenges and opportunities. We are committed to transparency, continuous learning, and adaptive strategies. Our success will be measured not just in the number of RBDs elected, but in the positive impact on governance, which will increase public trust in our institutions.

The Rational Governance Alliance stands at the forefront of a new era in democratic governance. By merging the best of human wisdom with the analytical power of AI, we aim to create a more efficient, transparent, and responsive system of governance. We invite you to join us as we take these first steps towards a brighter, more rational future.

Together, we can redefine what it means to govern and be governed. In the age of artificial intelligence we will reap peace and prosperity.

Sincerely,

Victor Miller Founder, Rational Governance Alliance
